

# EUROCAVE® WINE CELLARS

EuroCave Performance 283 3-Temp

- **Constant Temperature** – Thick walls combined with EuroCave’s insulated thermal regulation system maintain a steady temperature between 53° and 57°F
- **Controlled Humidity** – Stone-relief aluminum ceiling and walls together with EuroCave’s Hygro+ Humidity Management System guarantee an ideal humidity rate of over 50%
- **Slow & Permanent Ventilation** – A constant flow of filtered air is achieved by the fluctuation in pressure between vents at the top and bottom of the cabinet
- **Thermal Insulation/UV Protection** – Solid or UV-protected doors coupled with EuroCave’s special insulation guard against light and heat, preventing the premature deterioration of wine
- **Barrier Against Vibration** – Eurocave’s Vibration Exclusion System absorbs tremors and shakes that can disturb the maturation process of wine
